

EENEE ORGANIC WASTE WHEELIE BIN STICKER

Congratulations and thank you for investing in our Australian Designed and Made Eenee Compostables. Eenee Designs is proud to offer you the world's first compostable disposable made from sustainable materials and designed to be easily, hygienically and economically 'recycled' into valuable soil conditioners through commercial composting.

Fortunately if you live in the Coffs Harbour, Nambucca Shire Council and Bellingen areas you are provided with the progressive Coffs Coast Waste Services weekly collection of uncontaminated organic household waste.

Compost Australia has endorsed Eenee Compostables as being acceptable for commercial composting and following testing through your local compost facility, Biomass Solutions, this service is now accepting our unique Eenee Compostables for processing. The collection service, Handybins will allow you to place eenee nappies in your green weekly organics bin as long as it is identified with this bin sticker.

IMPORTANT CONDITONS OF USE

ONLY Eenee Compostables are approved for inclusion in your weekly organics collection.

DO NOT place any other nappy brand (including so called 'eco' nappies), or other nappy products in the bin.

ATTACH this bin sticker on the **front** of your organic wheelie bin, just below the lid and above the Coffs Coast logo. This will help identify your household as an Eenee Compostables user so the bin is not rejected for collection.

REMOVE the sticker if you stop using the Eenee Compostables or if you move properties.

PLEASE DO NOT Contaminate your organics waste wheelie bin with non biodegradable plastics which would devalue the end compost. It is very important that the compost facility only receives fully compostable materials which they have tested and approved for their service.
